A dedicated cyber security graduate with solid collaboration and team-based skills to produce innovative and dynamic solutions achieved through intensive planning. Experienced in security and networking, aiding in the work process to create completely functional designs with groundbreaking solutions.

Education

- Bachelor of Computer Science specializing in Cyber Security, 2021 - 2024
Asia Pacific University, Kuala Lumpur, Malaysia
- Master of Science specializing in Artificial Intelligence, 2024 - 2025
Asia Pacific University, Kuala Lumpur, Malaysia
- Designed a SIEM program which uses Windows Event Viewer for log collection to detect threats for my graduation project. For my Masters, I am doing research on the usage of EDR to enhance my current system.
- Worked with backend programming languages such as Python and R, frontend programming languages such as HTML and CSS, and databases such as SQL and MongoDB.
- Studied vulnerability assessment, penetration testing, security and forensic technologies.
- Focused on software, database, and wireless security.
- Learned about deep learning, cloud computing, and networks.

Experience

Retaam Solutions, Riyadh

Intern

(03/2023) - (08/2023)

Certificates

- **Data Visualization using Various Python Libraries:** Prince Sultan University
- **Elite Live SOC Module:** Tecforte
- **IT Revolution and Cybersecurity Trends:** Asia Pacific University
- **Data Science, Ethical Hacking, Network +, Security +, CCNA, Cyber Security:** Udemy
- **Cyber Security:** Coursera
- **Security +, Digital Landscape, Digital Marketing:** STC Academy
- **Cyber Security and Data Analysis Foundations:** IBM

Skills

- Sharp decision maker
- Complex problem solver
- Creative and innovative design
- Strong speaking skills
